

# RESEARCH & DEVELOPMENT

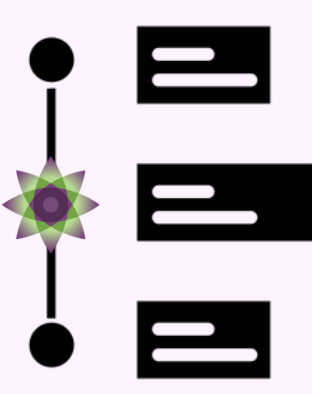

Prior to every project, WECO conducts Research & Development trips that enable us to:

**Investigate** and **relationship-build** with prospective partner NGOs

**Establish** the foundation for a needs-based project designed to benefit women and girls

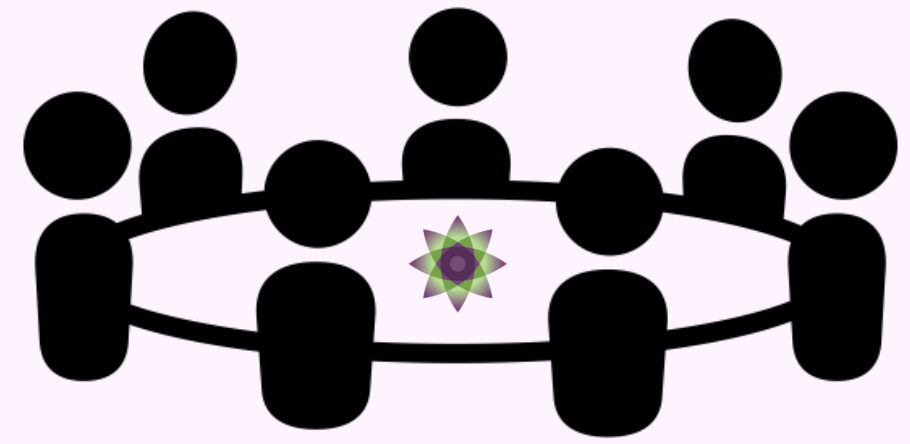

**Collaborate** on realistic timelines and preliminary project details

**Begin** early stages of planning for the group project trip, including research into accommodation, responsible adventure destinations, and related travel logistics

# PARTNER FEEDBACK

## **Women's Resource Center** ***Siem Reap, Cambodia***

“We are truly grateful to the team, volunteers, and supporters of WECO who have made a massive difference for us. The childcare center will welcome children and families from the community, especially mothers who are keen to get back to work and who are looking for affordable, quality child care.”

## **Ponheary Ly Foundation** ***Siem Reap, Cambodia***

“Some organizations only want to hear about numbers, and WECO is not one of them. We are grateful for their partnership, the basis of which made the launch of our mentorship program possible, [one that] involves equal investment in the *quality* of education and support our students receive, not just the quantity.”

## **Awamaki** ***Ollantaytambo, Peru***

“WECO attracts amazing volunteers who work hard, are open to learning, and who seek to make genuine connections in the communities they visit. [Their] model for supporting women’s empowerment and community development projects through local partners is more than refreshing; it is thoughtful, humble, and sustainable.”
